WIS 93 Project in Design Phase

Development south of Eau Claire has led to increased traffic on WIS 93.

To accommodate this increased demand for safe and efficient transportation, the Wisconsin Department of Transportation is working on plans for a four-lane WIS 93 from Cedar Road to Lorch Avenue in Eau Claire County.

The four-mile proposed project will be completed in two phases—the first from Lorch Avenue to Tamara Drive and the second from Tamara Drive to Cedar Road.

The expanded highway will have a posted speed limit of 55 mph.

With this project, a number of changes will also be made to local road access to WIS 93, including the following:

- ❖ Short extension of Cedar Road east
- ❖ Aligning Benrud Lane with existing Hickory Road and Michael Drive/Cedar Park Subdivision
- ❖ Short extension of Homestead Road south
- ❖ Aligning Molitor Road with existing Walnut Road
- ❖ Aligning Garfield Road and Tamara Drive to one intersection
- ❖ Realigning County "H"
- ❖ New intersections south of existing Vold Court and south of existing Friedeck Road
- ❖ Median crossover between Hickory Road and Redwood Drive and between Walnut Road and Tamara Drive
- ❖ Closing existing north access of Redwood Drive (south access remains)
- ❖ Connecting Friedeck Road with east frontage road at Lorch Avenue
- ❖ Extending west frontage road at Lorch Avenue to the south to Waste Research and Reclamation

A bike path will be constructed along the east side of WIS 93 from Lorch Avenue to the Woodfield Subdivision at Walnut Road.
